

This book is for teachers at all levels: K-12, university, and beyond. It is both a memoir and a teaching guide, explaining how to make schooling a continuously enhancing and enabling process that excites students and allows them to change the world for the better while in school. It emphasizes learning of meta-skills that will benefit students throughout life.

Steve M. Potter, PhD, has been teaching since 1986 at the university level. He won the top teaching awards at Georgia Tech and across all research universities in Georgia for his innovative real-world approaches to enhance student learning and motivation. He is an Adjunct Associate Professor in the Coulter Department of Biomedical Engineering at Georgia Tech and Emory University, where he and his research group carried out pioneering neuroengineering research since 2002. From 1994-2002, he was Biology Research Faculty at Caltech. He now does scientific consulting, writing, and maker workshop teaching in Ireland. See: potterlab.gatech.edu and steveMpotter.tech
